Education

BFA in Graphic Design
Cal State Fullerton

Product designer and front-end engineer with 15+ years across consumer media and developer infrastructure. I've built 0-to-1 engineering products and lead design in deeply technical domains.

Netflix

Aug '18 - Jun '26

Los Gatos, California

Sr. Product Designer, Infrastructure Engineering

Founding designer for Infrastructure Engineering, delivering 0-to-1 internal tooling to a ~2,000-engineer user base, with 600–1,000 daily active users on flagship products. Designed Explore, a unified surface for metrics, traces, and logs troubleshooting, and Spotlight, a centralized engineering hub for software ownership, campaign tracking, and software best-practices. Hired and ramped designers into a deeply technical domain, helping build the org's first design practices. Led design across both internal Netflix products and open-source community initiatives.

Sep '17 - Aug '18

Sr. Product Designer, Marketing Engineering

Design and front-end-development on an in-house digital asset management (DAM) platform unifying the Marketing Creative, Marketing Operations, and Marketing Communications teams. Replaced fragile, shared spreadsheets with a single product that unified campaign and asset production.

Pandora

Apr '17 - Sep '17

Oakland, California

Sr. Product Designer

Led product design for display advertising on Pandora.com, serving millions of daily ad impressions. Designed the integration UX for the Sonos device line.

Jul '16 - Apr '17

Sr. Software Engineer

Helped rewrite Pandora.com in React and Redux as member of the core web team, serving millions of listeners. Served as engineering liaison on key UX implementation decisions, owning complex interactions between audio playback, user interactions, and advertising.

Jan '15 - Jul '16

Software Engineer

Transitioned formally from design to engineering. Built a touch-friendly Windows 10 desktop app in WinJS with a five-person team. Sole front-end developer of a web dashboard generating detailed visual reports of advertiser campaign performance.

Jan '10 - Dec '14

Web Designer, Front-End Developer

Designed and built landing pages for musicians and dozens of dynamic display-ad campaigns, plus production templates that accelerated the approved-asset production flow by at least 3x on any campaign that used one. Co-developed a shared JavaScript ad API adopted across all platforms.

Dec '09 - Dec '10

Production Designer

Designed and produced display ads for Pandora.com and mobile applications.

Gov

Aug '07 - Aug '09

Federal Government – Washington, DC

Graphic Designer
